## 4x4 EQUIP

### COMBO SHOVEL & SPLIT SHOVEL UPGRADES & **NEW** STUMPY SHOVEL

The popular three-piece Combo Shovel and two-piece Split Shovel now have a new black-coloured handle and the Combo Shovel features a heavy-duty cushioned D handle and an additional rubber grip for comfort.

Both these Shovels continue to incorporate a steel reinforced shaft and heavy duty steel joining sleeves making them extremely strong and durable.

We've checked out some of the imitation units on the market and have found the connections and the shaft to be weak links, compared with 4x4 Equip products. When you need a shovel it's handy if it doesn't bend or fall to bits.

RRP for the Combo Shovel (three-piece) is \$94.95, including a carry bag and the Split Shovel (two-piece) has a RRP of \$84.95, including a carry bag.

## Stumpy Shovel

A strong shovel in a very small package, the new 4x4 Equip Stumpy Shovel is designed to be used as an emergency shovel or in vehicles where storage space is at a premium.

AT OTA we reckon it also has potential for use during the date-roll morning walk!

Sporting a full strength, hardened steel post-hole blade and a full size D handle the Stumpy Shovel also features a strong steel joining sleeve that allows it to be broken down into two pieces for easy storage.

Complete with carry bag it can be slipped safely under a vehicle seat or into other confined spaces. Length when broken down is only 460mm and RRP is \$59.95.
