

## NEWS - NISSAN NAVARA UPGRADES DUAL CAB

**The latest Dual Cab Navara retains the proved 2.5-litre diesel four, but it now has more power and torque, lower emissions and improved fuel economy.**

Now producing 140kW of power (up from 126kW) and 450Nm of torque (up from 403Nm), the improved engine has a new direct injection system, which operates at 2000 bar, up from 1800 bar. This increase in pressure means the fuel spray is finer, resulting in more efficient combustion.

A new cylinder head with parallel ports smooths the intake and exhaust flow, fed by a new variable nozzle turbo (VNT) with electric control replacing the previous hydraulic system.

Emissions are reduced by the fitment of a bypass valve in the exhaust gas recycling cooling system allowing the EGR system to warm up more quickly from a cold start. CO<sub>2</sub> emissions are cut substantially by 40g/km to 224g/km

Nissan claims the six-speed manual version uses just 8.5-litres of diesel per 100km, over the combined fuel cycle test; 13 percent less than before. The five-speed automatic ST-X Dual Cab uses 9.0 L/100km, compared with the previous 10.5L/100km.

The 198kW V6 4.0-litre petrol engine currently offered in the ST-X continues unchanged.

Active safety is improved greatly by the addition of Nissan's Electronic Stability Program as standard on ST-X diesel models.

### **Cosmetic Changes**

The ST-X Dual Cab has slightly re-profiled front end styling for 2010 that extends overall length by 80mm and new six-spoke 17-inch aluminium wheels are fitted.

Inside the cabin of the Series 4 Navara ST-X are new switchgear, revised door trims, new seat fabric and the addition of chrome highlights and revised dials. Switchgear changes include a new, easier to use, all-wheel drive command control switch while the steering wheel controls for the phone and audio are now illuminated.

The new ST-X also gains dual zone climate control, power folding mirrors, Bluetooth hands free phone connectivity, auxiliary input for MP3 devices and a trip computer.

The new Series 4 Nissan Navara ST-X is available in four variants: ST-X petrol manual and auto, and ST-X diesel manual and auto.

Nissan Navara ST-X Petrol 6-speed Manual - \$47,990

Nissan Navara ST-X Petrol 5-speed Auto - \$50,240

Nissan Navara ST-X Diesel Manual - \$50,990

Nissan Navara ST-X Diesel Auto - \$53,240
