

NEWS Toyota HiLux Safety Initiatives

Australia's most popular ute, Toyota's HiLux, has been given some late 2009 passive safety improvements but still no stability control.

HiLux SR5 Double Cab 4x4 models now have sports-style front seats, side airbags for the front seats and curtain-shield airbags, in addition to the existing driver and front-passenger airbags.

Other SR5 upgrades include cruise control, privacy glass on rear door and back windows, and a new audio system with six-CD multi-changer, USB port, Bluetooth connectivity, colour LCD screen and steering wheel controls.

Already high SR5 pricing has escalated by \$1850 for 4x4 SR5 models.
